

INVITATION

Classroom Stories

Creative tools in the student-centred 21st century classroom

Join our international speaker, Paul Hamilton as he takes you through a visual journey of how creative teachers use mobile technologies over traditional technological tools, to create relevant and collaborative learning spaces.

Paul explores how the iPad complements proven pedagogical practices, whilst at the same time inspires students to create and publish authentic content that is only restricted by their imagination. Paul shows examples of how this powerful device allows students' thinking to become visible, enabling teachers and students to plan more effective pathways for learning.

Paul Hamilton

Head of Learning Technologies
Matthew Flinders Anglican College, Australia

Paul is the 'Head of Learning Technologies' at Matthew Flinders Anglican College, Australia, renowned for his work in the effective use of the iPad, Augmented Reality and iBeacon technology. Paul is a best selling Published Author, Award Winner, Apple Distinguished Editor, App Developer and sought after Keynote Speaker. The creators of Estimote, one of the fastest growing technology companies in the world, have labelled Paul an "Edtech Pioneer".
